

CME INTIMATION

ONE-DAY COURSE ON

“ SMALL PARTS (scrotum-testes, breast, thyroid and salivary glands), BOWEL AND APPENDIX ”

ON 25TH AUGUST 2018

ORGANISED BY:

CHIKITSA DIAGNOSTIC & ULTRASOUND TRAINING CENTRE

CONVENER :

DR ANIRUDH BADADE, MD (Radiodiagnosis)

Hon Sonologist Nowrosjee Wadia Maternity Hospital, Mumbai

Hon Asst Radiologist, Rajawadi Municipal Hospital, Ghatkopar, Mumbai

Faculty in National and International Conferences

**Venue : CHIKITSA DIAGNOSTIC & ULTRASOUND TRAINING CENTRE, 6,7 Mahinder Chambers,
Opposite Duke's Factory, W.T Patil Marg, Chembur(e), Mumbai, 400071**

Introduction

Though there are several referrals for sonography of the small [parts and bowel-appendix, the confidence level of the Radiologist is not very high in reporting in these areas. This is partly because uncertainty about the normal appearances, and unfamiliarity with the sonographic appearances of various pathologies. For example, in the case of the breast, there is a lot of uncertainty about the normal and abnormal appearances and the method of reporting pathologies.

Often we have no follow-up of our patients and therefore have no verification or authentication of our reporting.

Though gross findings are usually picked up by the Radiologist, the subtle ones are often missed. Many Radiologists have not been exposed to too many patients in this subject. Therefore this subject remains a bit obscure for many Radiologists.

This course is meant help narrow this gap of knowledge and enable the participants to do ultrasound in this field with a greater degree of confidence and promoting referrals in their ultrasound practice on this subject.

Course Structure

The course will be run for 1 day. It will focus on the normal sonoanatomy, ultrasound appearances of the principal pathologies and the techniques of examination. It will consist of lectures, live demonstration and limited hands on scanning under experienced supervision.

Learning Objectives

At the completion of this course, participants should understand what information the ultrasound examination is meant to provide, and should be able to describe the normal ultrasound findings and findings in pathologies. Following the live-demonstration and limited hands-on sessions, participants should be able to demonstrate sonoanatomy and the techniques of examination.

Hands on content

- Supervised practical handling of the probe and the US machine settings.
- Supervised identification of sonoanatomy.
- Supervised performance of special techniques such as the rolled nipple technique

Number of Delegates

Number of Participants: Maximum 6 participants.

Target Audience

This course is designed to meet the needs of sonologists who are well versed in routine ultrasound scanning and want to gain confidence in the ultrasound examination of small parts, bowel and appendix.

SCIENTIFIC PROGRAM (8 hours approximately)

INTRODUCTION and OVERVIEW
BREAST ULTRASOUND
ULTRASOUND OF THE SCROTUM AND TESTES
THYROID ULTRASOUND
SALIVARY GLAND ULTRASOUND
BOWEL SONOGRAPHY
APPENDIX
LUNCH
HANDS ON AND LIVE DEMO
QUESTIONS AND ANSWERS

The program is subject to change.

Course Fee Structure: Rs. 15,000/- per delegate inclusive of registration, course material and meals.

ENTRY LIMITED TO FIRST SIX DELEGATES ONLY
