

2 DAY COURSE in
FETAL NEUROSONOGRAPHY

ORGANISED BY:

**CHIKITSA DIAGNOSTIC AND ULTRASOUND TRAINING CENTRE,
MUMBAI**

LEADERSHIP THROUGH EXCELLENCE. SERVICE THROUGH TEACHING

Introduction

A targeted and detailed study of the fetal brain and spine is sometimes needed in the clinical practice of ultrasound. Neurosonography has become an important skill to acquire in antenatal sonography today and is needed in all cases of ventriculomegaly, ventricular asymmetry, open 4th ventricle, cystic intracranial lesions, posterior fossa lesions etc. Though neural tube defects are a leading cause for medico-legal problems, they can still be difficult to detect especially when not associated with a cystic component. Detecting lesions like tethered cord may not be easy, but do have clinical significance.

This course is meant to orient the Sonologist in this rather obscure topic of Neurosonography and help the Sonologist start doing fetal neurosonograms in clinical practice.

Course Structure

The course will be run for 2 days. The day will start with lectures. Reporting methodology will be taught to the candidates.

Hands on content

The candidate has the option of increasing the number of days of hands-on, if feasible.

Number of Delegates

Number of Participants is generally kept small --- typically 6 -10

LECTURES (9 hours approximately)

TECHNIQUE and NORMAL APPEARANCES OF FETAL BRAIN AND SPINE	MALFORMATIONS OF CORTICAL DEVELOPMENT
NEURAL TUBE DEFECTS	CYSTS AND TUMORS OF BRAIN
DISORDERS OF VENTRAL INDUCTION --- MIDLINE DEFECTS	INTRACRANIAL HEMORRHAGE, DESTRUCTIVE LESIONS, INFECTIONS, HYPOXIC ISCHEMIC ENCEPHALOPATHY
VENTRICULOMEGALY 30 MIN	ORBITS
POSTERIOR FOSSA	

The program is subject to change.

OUR TEAM :

Author of several papers in indexed international and national journals.

DR ANIRUDH BADADE, MD (Radiodiagnosis), DMRD

Well known expert and Teacher in Fetal Ultrasonography

Experience of 30 years in specialized Fetal Ultrasonography

Director, Chikitsa Diagnostic And Ultrasound Training Centre, Mumbai, which has trained over 4000 post-graduate doctors in Ultrasonography and is recognized as a leading training centre in India.

Faculty in several national and international ultrasound conferences and workshops

Asst Honorary Radiologist, Rajawadi Municipal Hospital.

Ex-Honorary Radiologist, Nowrosjee Wadia Maternity Hospital, Parel, Mumbai

DR KALPESH KHATAL, DMRE

Well known expert and Teacher in Fetal Ultrasonography and Fetal Medicine Programs

Experience of over 9 years in specialized Fetal Ultrasonography

Consultant Sonologist, Chikitsa Diagnostic And Ultrasound Training

Author of several papers in indexed international and national journals.

Faculty in Fetal Medicine and Fetal Ultrasonography training programs.

DR MEENAKSHI BADADE, MD (Radiodiagnosis), DMRD

Well known expert and Teacher in Fetal Ultrasonography

Experience of over 25 years in specialized Fetal Ultrasonography

Director, Chikitsa Diagnostic And Ultrasound Training Centre, Mumbai, which has trained over 4000 post-graduate doctors in Ultrasonography and is recognized as a leading training centre in India.
